

2

Woodhouse, 1632.

A new Almanack, and  
Prognostication, for the  
yeare of our Lord God

1632.

*Being the Bissextile, or Leape Yeare.*

Containing sundry rules, notes, &  
directions necessary for most sorts of  
men, serving indifferently for all this  
Kingdome of great Brittain. But more  
especially for the Meridian of the an-  
cient Citie of Chichester, and the Sou-  
therne parts.

Made, and collected by *Iohn*  
*Woodhouse* Philomath.

LONDON,

Printed by *W.S.* for the Com-  
panie of Stationers.

The common Notes, and moucable Feasts,  
according to the

Olde account, bled  
in England.

New account, bled  
beyonthe Seas.

*Mens. Micha.* 27 }  
*Craft. Animar.* 3 }  
*Craft. Martln.* 12 } of November.  
*Edmund, King*, 19 }  
*S. Katherine*, 25 }

---

The first day after every of the Feasts set downe for every Terme, the Court of the Arches is kept in the fore-noon in Bow-Church: And the Admirall Court the same day in Southwarke, in the afternoone,

The

## Woodhouse. 1632.

The second day after euery of the said Feasts, the Aud-  
ience Court is kept, in the forenoone in the Consistory in  
Paules, and the Prerogative in the same place, in the after-  
noone. The 3. day following euery of the said Feasts, the  
Bishop of Lond<sup>o</sup>, his Consistory Court is holden in Pauls,  
in the forenoone, and his Chancery Court of Delegates, in  
the same place after noone. The 4. day following the said  
Feasts, his Chancery Court of High Commission, is kept  
in the Consistory in Paules, or (as of late yeares) at Lam-  
beth, or in the Lord Bishop of London his palace, on Thurs-  
day after noone. But if any of the dayes before recyted bee  
Sunday, or an Holy-day, then is such Court kept the day  
following.

In Hilary Terme, 4. of the aboue named Court dayes, be  
ordinarily kept, and as many in Easter and Trinity Termes;  
according to the course of the yeare, as the Judge in the Ar-  
ches in his discretion shall thinke good, who at the end of  
euery Terme appointeth the Court dayes to be kept in the  
next Terme, but in Michaelmas Terme, the Court dayes  
for the same before set downe, (if as in the rest of late dayes,  
they be not altered) were wont certainly to be kept.

If therefore aduise all Country men, (especially those that  
dwelle farre off) being cyted by any originall proccesse to ap-  
peare in the Arches, Audiance, Prerogative, or Delegates,  
to send to some Doctor, a note of the cause, and to what  
Court they be cyted, to appeare for them, and to returne  
them word of the very day in which it shall be needfull for  
them to appeare in person.

But in the course of practice in the High-Commission, and  
the Admirall Court, it is otherwile, for euery person cyted to  
those Courts, must appeare personally.

## A Prognostication

The Termes, with the Act, and Commencement  
dayes in both Vniversities.

**H**illary Terme, beginneth in both, January the 13. and  
endeth at Oxford, the 24. of March, and at Cambridge  
the 28. of March.

Easter Terme, beginneth in both, April 11. ends at Ox-  
ford the 17. of May, at Cambridge July the 2.

Trinity Terme, begins at Oxford May the 30. and ends  
the 9. of July, but may be prologued ad Magistrorum bene-  
placitum.

Michaelmas Terme, begins in both, the 9. of October,  
and ends December the 15.

The Act, or Commencement of Bachelors in both, is  
the first day of Lent, February the 15.

The Act of Doctors, and Masters in Cambridge, is the  
2. of July, in Oxford the 9. of July.

## The *Quatuor Tempora*, or Ember-Fasts.

These fasts were appointed, about the yeare of our  
Lord, 212. The next Sunday after which fasts,  
Deacons and Ministers are usually ordained.

*Post cineres, Pnema & post crucem, postq<sup>ue</sup> Lucia  
Mercurij, Veneris, Sabati Ieiunia fient.*

The	}	Wednesday, Friday, and Saturday.	}	after	}	1. Sunday in Lent. Feb. 19. Whitsunday. May. 27. Holyroode day. Septemb. 14. Saint Lucie. December 12.
-----	---	--	---	-------	---	---

## The times of Marriage prohibited.

*Coniugium Adventus tollit; Hilariq<sup>ue</sup> relaxat;  
Septuagena Vetat; sed Pascha Octava reducit;  
Rogamen Vetitat; concedit Trina potestas.*

## Woodhouse. 1632.

No Wed- } January the 18. vntill Aprill the 9:  
ding without } May the 7. vntill May the 18.  
Licence this } December the 2. vntill January the 13.  
yeare, from } in the next yeare,

Genenerall Observations, and profitable  
to be regarded.

**G**raft, and plant trees, the Moone being new, and in  
Taurus, Virgo, and Capricornus, the Wind South or  
West.

Remoue, and set young Trees, from October vntill Fe-  
bruary, setting alwayes that side of the Tree toward the  
South, which was befoze, the Wind Southerly, or at  
West, and the weather warme, and drie, and in the new of  
the Moone.

Cut Vines in January, or February.

Fell Timber to continue long, & to be without wormes,  
in December, or January, two or thre dayes befoze the  
change of the Moone. But if you will haue it to grow a-  
gaine, cut it downe, in the new of the Moone.

Cut hedges betweene the change of the Moone, and the  
full, from the end of January, vntill May.

Sheare Sheep, cut haire, and sow all manner of Corn,  
in the new of the Moone.

Sow and sow all kinds of Seeds, the Moone in Aries.  
Taurus, Cancer, Virgo; Libra, Capricornus, Aquarius, or  
Pisces, but the Seeds whose Rootes be round, should be  
sowne, or set, thre or foure dayes befoze, or after the full of  
the Moone.

Dung Land, that weeds may not abound, in the last  
Quarter of the Moone.

Sow, or Lib Catell, the Moone in Aries, Libra, or Sa-  
giarius, after the full of the Moone: you may let them  
bloud at any time, the signe natbring in the heart, no in  
the place where the incision is to be made, nor in the day

## A Prognostication

of the change of the Moone.

Gather flowers, and seeds, such as you minde to keepe all the yeare, at the full of the Moone. Dry your flowers in the shade till they be almost dry, and then Sunne them a little for feare of moulding, or corrupting. Doe the like with your herbes, but seeds will endure the beames of the Sun.

Gather Apples, and Wardens in the last quarter of the Moone, lay every sort by it selfe (without any fallings among them) vpon bare boards, or on a plaister-floore, vntill the end of Nouember, the thinner they lye the better, let the place be close shut in frosty and extreame cold weather, then to coner them ouer with fine Hay, or Warly chaffe, will not be amisse. But Wardens so gathered, and layd on dry boards, need no conering.

## Generall Rules of Physicke.

**C**ut no veine, nor let blood, when the signe is in the place where the incision is to be made, neither when the Sun, or Moone are afflicted with the malignant Planets, Saturne, or Mars: let it be done in the morning, after Sunne rising, and while the patient is fasting; if in the Afternoone, then after perfect digestion, the ayre being temperate.

In letting of blood, the Physitian, or Chyrurgion must be carefull of his patient, for many times the secret and vilered, by letting of blood, open a way to dangerous infirmities, and oft to present death. It is not conuenient that a leane, and weake man, or woman, or one that is fat, or grosse, nor for a child to be let blood. It is to be considered how it standeth with the patient inwardly, for his complexion, and age for the time of the yeare, and of the day. Therefore it is best to let blood, in faire, temperate, and Sun-shine weather, not to sleepe presently, nor stirre violently.

# Wood-house. 1632.

The best times to let blood, be

For the	{	Sanguine,	{	in	{	Cancer, or Pisces.
		Cholericke,				Cancer, Scorpio, or Pisces.
		Melancholike,				Libra, or Aquarius.
		Phlegmaticke,				Aries, or Aquarius.

For the Phrensie, Pestilence, Squinancie, Plurisie, Apoplexy, continuall Head-ach, hot burning feuer, or any other extreame paine, or dangerous disease, remedy must be sought with all convenient speed, but then blood is not to be left in so great quantity, as if a chosen time might be taken;

It is best to bathe, the Moone in Aries, Leo, or Sagittarius, for health.

Bath for cleanness, in Libra, and Pisces.

Sweatings, as they are of two sorts, that is Naturall, and Artificiall, so they be for two purposes. The Naturall Sweat (good heed being taken in opening the pores) will dissolve grosse, and thicke humors, will cleanse the blood, will comfort the spirits, will put away cold, will consume raw humors, will helpe Humnesse, and the Droopie. The Artificiall Sweat will cleanse scabs, put away itch, amend dulnesse in hearing, ease the stone, resolve the congealed, and cold melancholly blood, and humors. But for the better performing, and effectuall working in these cases, the counsell of the learned Physitian is to be desired, who will consider many Astrologicall obseruations, necessary in blood letting, purging, and Bathing.

The best times to sweat in, are, the Moone being in Aries, Leo, and Sagittarius.

Obfer-

## A Prognostication.

Observations of Husbandry, Gardening,  
and other things, in every Moneth  
of the yeare.

**E**very skilfull, and diligent Husbandman, will first looke to the nature of the ground, that he is to till, next to the seasons of the yeare, then to the customes and fashions of the Countrey and place, which although some men hold as second Natures, yet as it is not good for any man to be too prejudicate in his owne opinion: So let not any man be too great a slave to other mens traditions, but to stand upon the ground of reason, made good by experience.

Husbandry doth varie, according to the nature, and Climates of Countries: for as the earth, the ayre, the little or much heate, cold, or moisture doth increase, or diminish: So must a good Husbandman, alter his seasons, labours, and instruments. In the fruitfull Vales of this Land, where is stiffe clay, and in all other places of the like Nature, all tillage must be begun betimes in the yeare, the Plowes and other implements, must be large, and strong, and the labour great, and painefull. In mixt soyles, that are fruitfull, arable workes should begin at later seasons, the Plowes, other necessities, and labours, are to be somewhat lesse, than the other.

In light Sandy grounds, that be fruitfull, their seasons be latest, their furniture, and labour least.

Lastly, in Warren, and vnfruitfull Fields, the arable soyles require a fit season of the yeare, for in all places (Anus fructificat, non ager) and the Plowes, and implements must ever be framed, according to the nature of the ground.

## Generall rules in Gardening.

**I**n these Southerne parts: Gardening may be moze time. ly done, than Northward, and in the midst of this Land where the ayre is not so favourable.

2 In setting hearbes, leaue no top moze than an handfull

## Wood-house. 1632.

fall aboue the ground, nor more than a foote deepe in the earth.

3 Twine the rootes of those slips you set if they will abide it, Gilliflowers are too tender,

4 Set moist, and sow dry.

5 Set slips without shankes any time, except at Midsummer, or in frowles.

6 Sceding spoyle the most Rootes, by drawing the heart, and sap from them.

7 Gather for the pot, and medecines hearbes tender, and greene, the sap being in the top, but in winter the roots is best.

8 All the herbes once in seauen yeares would be renewed, except Rosemarie.

9 These require whole plots. Artichokes, Cabbages, Turneps, Parseneps, Onions, Carrets, Saffron, and Sherrits.

10 Gather all your seeds, dead, ripe, and dry.

11 Lay no dung to the rootes of your hearbes, for dung not rotted, is too hot, euen for trees.

12 Thin setting, and sowing, (so that the rootes stand not aboue a foote distance) is profitable for the hearbes will like the better, and greater hearbes require more distance.

13 Set, and sow hearbes in their time of growth (except at Midsummer, for then they are too tender) but trees in their time of rest.

14 A good Huswife may, and will gather a doz of hearbes for the pot about Lammas, and dry them, and pound them, which in winter will doe her good service.

15 Weed your Garden with weeding knives of fingers, after a showre of raigne, and let the Weeders learne to know hearbes and pong Trees, from weeds.

January.

In January set or sow Kernels, or Berries, of Baytrees, Prinet, or Box. Set Quicksets, Rottrees, Peaches, Filbeards

## A Prognostication.

Prune and Plum-trees, and (if the frost bee not too hard) remoue trees, prune or lop them befoze the full of the Moone. Sow, or set Pease and Beanes, and dung Land in the last quarter. Geld Cattrell for reare, fallow Land for wheat and Rie, trench Gardens with dung, and remoue Bees. For your owne health, keepe your body warme: Let good and wholesome dyet bee your Physitian, and rather with exercise and laboꝝ than saluice, encrease your appetite.

February.

**N**ow let, or sow all sorts of Beanes, Pease, and all other Puls, and Mustard seed. Cast by Ditches, set, and plant Vines, Hoppes, Gooseberries, and any fruit that growes vpon little bulbes, Prune and trim all fruit trees, from Mistle, Cankers, and all superfluous branches. Graft at the latter end of this Moneth. Sow Dates in cold, and stiffe land. For your health take heed of cold, forbear meates that are kinde and flegmaticke, and if great need require, Purge, Bathe, or Bleed, as Art shall direct you.

March.

**I**n the newe of the Moone (the wind any part South, or West) graft Pearre, Warden, and Apple Trees, make an end of sowing all sorts of Pulse, and begin to sow Dates, Barly, Onions, Parseneps, Carrets. Cowcumbers, Melons, and all kinde of Pot-herbes. Slip Artichocks and Sage. Geld Lambs. Let blood according to your youth, strength, and necessity, the signe, and weather being fit. Whatsoeuer disease cannot in the Spring time be cured by Physicke, will hardly be rid all the yeare after.

April.

**I**n Aprill sow Barly, Hempe, and Flaxe. Sowe Hoppes. Set and sow Garden hearbs of all sorts. Open Hives, and let Bees now labour for their lining. Let Tanners now provide them of Barke, and all good Huswines looke to their Daylies. By the direction of a learned Physitian, now bleed, and purge, and they that haue Belies or be trou-

bled

## Wood-house. 1632.

bled with the Gout, let them goe to the Bathes in this, or  
eithor of the two next Moneths.

May.

**S**ow Barly vpon all light lands, and burning grounds,  
and likewise Hempe, and Flaxe, and all manner of fine  
herbes, and seeds. Take Lambs from their Dams. S:te  
land, for Wheat and Rie. Leave lopping of trees. Teach  
Hoy to clumbe, but cut off the superfluous branches. Rise  
early, and walke in fragrant fields, and by sweet running  
fregines. Sage, and Sweet Butter is now an excellent  
Breakfast, clarified whey and Sage Ale, a most souveraigne  
drinke.

Iune.

**S**heare Sheepe. Bring home feshwell. Weed Cozne, and  
Gardens. Set Roiemary, Carnations, and Gillis  
flowers. Sow Lettice, and Radish, 3. or 4. dayes, after the  
full, for then they shall not run to seed. Make Hay.  
Carry Sand, Lime, Marle, and measure of what kinde  
soeuer to your Land, cut neyther Hedge nor Tree in this,  
and the two next Moneths. Beware of great thirst: Use  
light, and thin dyet, much exercise, and chaste thoughts.

Iuly.

**A**void making and getting of Hay, for a day slackt may  
be the losse of many pounds, the weather being uncon-  
stant. Pull Hempe that is ripe. Gather Garden Beanes.  
Set Rue, and Wormewood, to strow vpon adozes to drive  
away Moathes and fleas. fence your Coples. Use mode-  
rate dyet, and beware of great thirst, for nothing bringeth  
the Pestilence, or pestilent diseases sooner, than extreme  
thirst, and seruent heats, and cold taken suddainly vpon  
them. Beware of Physicke, bleed not, but vpon violent occa-  
sions.

August.

**F**ullosow your Cozne Haruest. Sow Winter herbes in  
the new of the Moone. Gather Garden seedes. Sow  
Barly and Dates. Gather your Summer fruits, and for  
health, refraine from sleeping after meate in the day time.  
Shun feasts and banquets, and let Physicke alone.

Septem-

## A Prognostication,

September.

**I**n this Moneth, and in the end of the former, gather Apples, when they waxe browne, the weather being faire and the Dew off the ground. Kill Bees, make Veruice, Sow Wheat, and Rie. Remoue and set all Cuppes of flowers, betweene the two Lady dayes. Put Swine to Mast. Remoue trees enery new Moone from September, untill February, especially in the new of the Moone, the weather faire and warme, the Wind South, or West. Use Physicke moderately. Forbeare frutes too pleasant, or rotten, and as deathly as Rhot, and Surfeiting.

October.

**S**ow wheat and Rie, the sooner the better for feare of rain. Sow Peznes and Nuts. Gather Winter fruit, the weather dry, in the after noons, and in the Wane of the Moone. Cut Rose trees (if you desire to haue store of Roses) but once in 2. yeares. Get warme cloathing, and goe dry shod, and for health refuse not any needful Physicke, from the hands of the learned. Use moderate sports, to reuue the spirits.

November.

**M**ake Malt. Kill Haggess. Trench Gardens with dung. Set Crabtree stocks. Sow Wheat and Rie in exceeding hat sandy soyles. Cut downe Timber, for Plowes, Carts, and other implements of Husbandrie. Use wholesome meats, and other drinke, with good exercise to preserve health.

December.

**I**n this and the next Moneth, cut downe great Timber, in the last quarter of the Moone. Incouer the Rootes of fruit Trees. Set Beanes, and Pease. Couer all your best flowers, and hearbs, from frosts, and stormes, with rotten old horse dung. Lookke well to Cattell. Water, and keepe moyst your Medowes. Let horses bloud, and to conclude, eat Meates that are hot, and nourishing. Drinke good wine, and strong drinke. Keepe thy body well clad, and thy house warme.

## Wood-house. 1632.

Swaine, Banish all cares from thy heart. Feast thy poore neighbours, reioycing that God sent his onely begotten Sonne about this time into the world.

Of the lengthening and shortening of the dayes.

**T**he three diuers motions of the Sunne be the cause why the day doth not lengthen and shorten at all times alike, and the vulgar sort be much deceiued, saying that the dayes doe lengthen and shorten an houre euery 15. dayes, which is not true. Indeed, from the 11. of March, vnto the 27. of April, that proportion is true, but then from the 27. of April, it must be the 17. of May, (which is 20. dayes) before the day be an houre longer, and from the 17. of May, at which time the day is 16. houres long, in the Latitude of 52. degrees, and 20 min. vntill the 12. of June, which is 26. dayes, the day is longer but halfe an houre, and 3. min. The like it doth in shortning.

Conjectures of Weather, by the Change, Full, and Quarters of the Moone.

**W**hen the Moone doth either Change, be at the full, or enter into her first, or last quarter in Aries, Leo, or Sagittarius, in Winter, it is commonly faire, but in Summer, hot, especially in June or July.

If the change, be at the full, or enter into her first or last quarter, in Taurus, Virgo, or Capricorne, in winter it is like to be cold, but in Summer temperate.

When the sayd times be in Libra, Gemini, or Aquarius, then looke for wind, especially in the Spring or Autumne.

But if the Moone be new; at the full, or come to the first or last quarter, in Cancer, Scorpio, or Pisces, in Winter, iudge of mofst, and raine weather, and sometimes Snow: but in Summer, good, and temperate weather, for the most part, yet sometime it raineth then, especially, when Venus is aspected with the Moone.

The

**The principall Fayres of England and Wales, orderly set forth; with the Moneth, Day, and Place, where they be kept.**

**Faires in January.**

**T**he third day at Lambith. Twelfth day at Salisbury. The vii. day at Langinnet.
